

# The Reveille

May 19, 2017, Issue 20

## ROTARY'S GUIDING PRINCIPLES

### OBJECT OF ROTARY

The object of Rotary is to encourage and foster the ideal of service as a basis of worthy enterprise and, in particular, to encourage and foster:

- First: the development of acquaintance as an opportunity for service;
- Second: high ethical standards in business and professions; the recognition of the worthiness of all useful occupations; and the dignifying of each Rotarian's occupation as an opportunity to serve society;
- Third: the application of the ideal of service in each Rotarian's personal, business, and community life;
- Fourth: the advancement of international understanding, goodwill, and peace through a world fellowship of business and professional persons united in the ideal of service.

### THE FOUR-WAY TEST

The four-way test is a nonpartisan and nonsectarian ethical guide for Rotarians to use for their personal and professional relationships. The test has been translated into more than 100 languages, and Rotarians recite it at club meetings: Of the things we think, say or do...

- Is it the truth?
- Is it fair to all concerned?
- Will it build goodwill and better friendships?
- Will it be beneficial to all concerned?

## This Week:

**3 Minute Speaker:** Joseph Kravitz

**Speaker:** Richard Bray: Medical Devices

## Old School Surgical Tools

by Mark Harris

A quick glance at our gallery of some of history's gnarliest surgical tools will definitely make you thankful for just how far our industry has progressed throughout time. Browse through images and descriptions of surgical tools dating as far back as the 1600's – a time when surgery was *definitely* not for the squeamish.

You might think your HMO plan is scary, but at least it doesn't use these vintage surgical instruments...hopefully.

**Amputation Knife (1700s)** Knives used for amputations during the 18th century were typically curved, because surgeons tended to make a circular cut through the skin and muscle before the bone was cut with a saw. By the 1800s, straight knives became more popular because they made it easier to leave a flap of skin that could be used to cover the exposed stump.

**Amputation Saw (1600s)** While some surgeons chose to flaunt their wealth with elaborately decorated saws like this, the crevices in the intricate engravings proved to be a breeding ground for germs.

**Arrow Remover (1500s)** Not much is known about this tool, but it is hypothesized that it was inserted into the wound in a contracted position, with the central shaft used to grasp the arrow. The blades, which appear to have their sharp edges facing outward, were then expanded using the scissor-like handles, thus expanding the flesh around the arrow to prevent the arrowhead from ripping through the meat as it was pulled out.

2016 Officers & Directors**

**President:** Ron Sigelman  
**Vice Pres/Secretary:** Barry Thompson  
**Treasurer:** Bob Fangmeyer  
**Directors:** Nick Martinez, Steve Vaccarezza

The Rotary Club of North Bethesda, known as the first breakfast club in Rotary District 7620, was chartered in 1974. The club is one of more than 30,000 Rotary International clubs in 168 countries.

North Bethesda has a diverse membership of business and professional men and women, and has provided continuing community and charitable services since its inception. It meets on Friday mornings at the Oakville Grille in Bethesda to enjoy a hearty breakfast, camaraderie, and to plan activities and fund raisers for Rotary causes.
